In his new book, *Crisis of the Two Constitutions*, Mark Levin argues that the United States is facing a crisis of constitutional proportions. He contends that the original Constitution, which was designed to limit the power of government and protect individual liberty, has been undermined by the Supreme Court's interpretation of the "living Constitution." This, he argues, has led to a dangerous expansion of government power and a decline in individual freedom.

Levin begins by tracing the history of the Constitution, from its drafting in 1787 to the present day. He shows how the Supreme Court has gradually expanded its power to interpret the Constitution, often in ways that have contradicted the original intent of the framers. This has led to a situation where the Constitution is no longer a fixed document, but rather a living document that can be interpreted to mean whatever the Court wants it to mean.

Levin argues that this is a dangerous situation, as it allows the Court to impose its own values on the American people. He points to a number of recent cases where the Court has struck down laws that were passed by democratically elected representatives. This, he argues, is a violation of the separation of powers and a threat to the rule of law.

Levin concludes by calling for a return to the original Constitution. He argues that we need to limit the power of the Supreme Court and restore the balance of power between the three branches of government. He also calls for a renewed commitment to individual liberty and the principles of limited government.

Crisis of the Two Constitutions is a timely and important book. It is a must-read for anyone who is concerned about the future of the American Dream.
