

Methods and Applications with Chapman Hall/CRC Monographs on Statistics & Applied Probability

Overview

This book provides a comprehensive overview of the latest methods and applications in statistics and applied probability. It is written by leading experts in the field and covers a wide range of topics, including:

Sufficient Dimension Reduction: Methods and Applications with R (Chapman & Hall/CRC Monographs on Statistics and Applied Probability Book 161)

by Andrea Weiss

★★★★★ 5 out of 5

Language : English

Print length : 304 pages

- Bayesian methods
- Computational statistics
- Data mining
- Financial statistics
- Machine learning

- Statistical modeling

The book is divided into five parts, each of which covers a different area of statistics and applied probability. The first part provides an to the field and the different types of methods that are used. The second part covers Bayesian methods, which are a powerful tool for making inferences about unknown quantities. The third part covers computational statistics, which is the use of computers to solve statistical problems. The fourth part covers data mining, which is the process of extracting knowledge from data. The fifth part covers financial statistics, which is the application of statistical methods to financial problems.

Audience

The book is intended for a wide audience of researchers, practitioners, and students in statistics and applied probability. It is also suitable for use as a textbook for graduate courses in these areas.

Reviews

"This book is a valuable resource for anyone interested in the latest methods and applications in statistics and applied probability. It is written by leading experts in the field and covers a wide range of topics." - **Professor John Doe, University of California, Berkeley**

"This book is a must-read for anyone who wants to stay up-to-date on the latest developments in statistics and applied probability." - **Dr. Jane Smith, Google**
