Reduce

The first step to sustainable chicken keeping is to reduce the amount of waste you produce. Here are a few tips:

- **Choose breeds that are known for their efficiency.** Some breeds of chickens are more efficient at converting feed into meat or eggs than

others. If you're looking to reduce your environmental impact, choose a breed that is known for its efficiency.

- **Feed your chickens a healthy diet.** A healthy diet will help your chickens grow strong and healthy, which will reduce the amount of waste they produce.
- **Use a deep litter system.** A deep litter system is a type of bedding that is made up of a thick layer of straw or wood shavings. This type of bedding helps to absorb moisture and waste, which reduces the amount of ammonia that is released into the air.
- **Compost chicken manure.** Chicken manure is a valuable fertilizer that can be used to improve the health of your soil. Composting chicken manure is a great way to reduce the amount of waste you produce while also benefiting your garden.

Reuse

Once you've reduced the amount of waste you produce, you can start reusing resources. Here are a few tips:

- **Use recycled materials for chicken housing.** You can use recycled materials such as pallets, scrap wood, and old tires to build chicken coops and runs.
- **Use chicken manure as fertilizer.** As we mentioned before, chicken manure is a valuable fertilizer that can be used to improve the health of your soil.
- **Use chicken eggshells as a calcium supplement for your chickens.** Eggshells are a good source of calcium, which is essential for the health of your chickens.

Recycle

Finally, you can recycle chicken manure and other chicken-related waste. Here are a few tips:

- **Check with your local waste management company to see if they offer recycling for chicken manure.** Some waste management companies offer recycling programs for chicken manure, which can help to reduce the amount of waste that goes to landfills.
- **You can also recycle chicken manure by composting it.** Composting chicken manure is a great way to reduce the amount of waste you produce while also benefiting your garden.

By following these tips, you can reduce your environmental impact while keeping chickens. Sustainable chicken keeping is a great way to reduce waste, reuse resources, and recycle chicken manure. It's also a great way to save money and improve the health of your chickens.
